3
Part I

Exploitation System in a nutshell

Basic features of exploitation systems throughout the world may be summarized as under.

1. Need of an Exploitation System

If somebody want to kill an animal and eat its flesh he has to create no special system. But if he wants to rear animals for milking, for plowing, for pulling a cart, breeding them for commerce etc then he has to create entire system comprising : shelter for the animals, fodder, fodder-storage, harnesses, shepherds, shepherd-dogs, animal medicine and so on.

Similarly, the exploiters who always are a tiny minority need to create cunningly a complicated exploitation system to control, subdue and exploit the masses who are in huge number.

Exploitation system enables the exploiters to exploit the labor of masses and own all the natural resources available in the territory. The exploiters at their will can use peoples' land any manner they wish. They can displace farmers from their land or demolish peoples' houses at meager compensation. Exploiters force masses to pay heavy taxes to run the state machinery of exploitation.

The companies of exploiters need masses to sell their produce to earn huge profit. Industries belonging to the exploiter community receive heavy subsidy on land, electricity, water, transportation and tax. Approach roads are build for their industry free of cost and government provide them full protection. Exploiter community members draw loan of millions from the nationalized banks, flee out of country (Examples : Malya, Nirav Modi etc). The banks are compensated from the tax money collected ultimately from the toiling masses. Every direct or indirect tax ultimately comes from the pocket of toiling masses no matter which class pays it.

Leaders riding the government borrow from IMF, World Bank

etc for various projects. They receive heavy commission from organizations given these tender to complete the projects. They sign various purchase deals with multinational companies and receive heavy commission. Thus they fill their personal coffer at Swiss banks. Ultimately the masses are under foreign debt not the leaders riding the government.

Enmity between nations is created and wars are fought at the expense of the indigenous soldiers and civilians so that huge commission can be extracted from the purchase of arms. Blood of common masses is shed so that exploiters can fill their coffers.

Exploiters consider themselves humans and masses as livestock in human form brought by god to serve them. Country therefore , belongs only to them and not to the masses. Remember the slogans "India is Indira, and Indira is India" ? "India Shining" only meant "Arya-Brahminists will shine". "Acche Din Ayenge" only meant "Good Days for Arya-Brahmins". Patriotism and nationalism means loyalty to Arya-Brahminists. Duped masses take their words literally in spite of several glaring examples.

Masses in general live in poverty and in slums. So called "Civilization" "Technological progress" etc are meant for the rich only. Big roads, Bullet trains, aircrafts, Malls, luxury cars etc are meant for rich as poor masses can not afford them.

Anybody who oppose them, will be labeled as unpatriotic, anti-national and so on. If people resist any of their exploitation (which they consider their divine right), their police and paramilitary forces will break their bones, kill them in firing; unleash terror, dumb them in jail indefinitely labeling them terrorists, anti-nationals, Naxalites and so on. Masses are always the softest target because masses are kept armless. Exploiters remain unharmed because they are armed and fortified.

2. Sham Democracy

Exploiter community needs masses to be subdued by whatever

effective, economical and safe deceptive means. Sham democracy is one of the means. Constitutional provisions of welfare, human rights, justice, equal opportunity, government of the people, by the people and for the people etc are false promises. They are meant to hide the cruel face of the parasite community of exploiters.

Democracy is sham because exploiters control the whole electioneering system where only rich can win. **People do not realize that if a person spends crores of rupees in election how can he serve people ? They will first recover their investment many fold. No matter which party comes to power they will benefit themselves at the cost of people.**

Spider (member of exploiter class) can freely walk anywhere in its net (system comprising police, judiciary, bureaucracy, etc) but other insects (poor masses) are caught in this net. Criminals of exploiter community escape from the court unharmed because police, CBI, FBI etc agencies present insufficient evidence against them. Almost nobody gets convicted. But millions of indigenous masses, on meager charges are languishing in jail because they have no money for bail. They are being kept in Jail indefinitely beyond their maximum possible punishment for the charges framed against them.

In America and several European countries, authors convincingly questioning Jewish holocaust are jailed. In India draconian laws such as POTA, POTO etc make mockery of democracy and human rights and reveal cruel face of Indian exploitation system. Through many Presidential Decision Directives such as FEMA etc fundamental rights guaranteed by American constitution are nullified.

Exploiters conduct MKULTRA etc mind control experiments, radiation effect experiments, electro magnetic frequency effect experiments, drug experiments etc on unaware patients, on kidnapped children, on many institutionalized children, on prisoners, on soldiers and so on.

Biological and Chemical weapons are tested upon unaware

masses.

With the intention to reduce population to almost 10%, and immense hate for indigenous masses, viruses such as AIDS and infertility drugs are developed in government laboratories and injected into the body of indigenous people through various vaccination programs run by world health organization and other such agencies. They want to get rid of over 90% of world population whom they consider surplus. Use of robot armies, drones and pilot-less air crafts; driver less taxis, buses and trains, robots in most of the industries and professions ensure that they can manage with remaining 10% indigenous masses as their slaves.

3. Essentials of an exploitation system :-

1. To keep the masses subdued, exploiters must have their own army and should prohibit masses from keeping weapons. Only resourceful person can get weapon licenses.

2. The exploiters keep masses ignorant and less educated. Pathetic state of primary education in government schools of India is a glaring example. Higher education is made beyond the reach of poor.

3. Through priests exploiters create servile mentality in masses through religions. The ruler is projected as a representative of god and the masters are considered as "Annadata" (who feeds his servants). Priests ensures that the masses always remain superstitious and emotionally charged. Through expensive religious rituals it is ensured that the masses should always remain poor.

4. Exploiters divide the masses in maximum possible divisions such as in contradicting religious sects, religious cults, and keep them conflicting with each other. Exploiter class has created new age religious sects and cults to fulfill this aim.

5. TV channels promote cunningness, selfish interest, opportunism, betrayal, immorality of all sort and dirty competition through TV serials where the family members are shown conspiring against each

other for their selfish interests. These serials are being watched by small kids who develop these traits automatically considering them normal behaviour. People of such mentality easily work for exploiters and betray their very near and dears to fulfill their selfish interests.

6. Corruption and crime is deliberately promoted because that ensures flow of commission from lower level to highest level. In India "Warli Matka" gambling lucky numbers are published daily in many reputed newspapers. Prostitution runs uninterruptedly before public eye. How can criminals go against an exploitation system that allow them ? Sometimes in a year or two few raids are made to pose that the government is against these crimes. The criminals are used against masses to protect the very exploitation system.

7. CIA runs narcotic (opium etc) business to meet its various expenses. CIA makes its money laundering through banks created for this very purpose. A whole structure of crime and criminals is maintained. With their help, CIA create dissents in countries, sabotage, and topple governments.

8. Exploiters keep the sections of masses always violently conflicting with each other so that they never unite against the exploitation system. Fake leaders of each section benefit from these conflicts.

9. Exploiters systematically keep the masses economically weak, helpless and troubled by many worries so they have almost no time and energy to think against the exploitation system. Therefore, bureaucracy and all services are deliberately made inefficient so that masses are troubled, harassed so that both the bureaucracy and masses have unfavorable attitude against each other. Therefore, people never unite against the exploitation system.

10. Fake issues and fake activities are those issues and activities which pretend benefit of masses but in reality the money, time and energy of masses is wasted and masses can be physically harmed. Exploiters create fake issues and fake activities with the help of their stooges and servile print and electronic media to ensure that people

always remain engaged and harmed in these fake issues and fake activities.

11. Exploiters must ensure that masses should not have direct control over any struggle against exploitation and oppression because it endangers the exploiters and their exploitation system. Their struggle must remain in the hands of fake leaders since the fake leaders are no threat to any exploitation system.

12. The exploiters should create a sophisticated system of surveillance upon the masses. CCTV cameras, micro chips on vehicles, cashless transaction data, mobile device data, internet activity data, Linking unique identification number of citizen (Adhar Card in India) with all services, satellite watch, watching through the TV, gathering information through state and center's surveillance agencies and their informers etc are few measures every exploiter system employs on the indigenous masses.

13. Exploitation system always base on caste system like hierarchical pyramid structure where minority Exploiters are at the top of the system and exploited and oppressed masses are pressed to the bottom of the pyramid. Between them lie bureaucrats and technicians of different levels and the middle class.

14. The communication pattern of exploitation system is from top to down. There is almost no upward communication. Horizontal communication occurs at every layer to implement orders coming from above.

15. Exploiters control food, water and electricity to humble the people. In the areas where people are resisting state terrorism, ration and other essential items are supplied to people selectively through the police and paramilitary forces.

16. The exploiter community always considers itself religiously, socially and economically superior and hates the masses. According to H.G. Wells, exploiters are not satisfied with their prosperity and power alone. To satisfy their sense of grandeur, masses must be

reduced to the level lower than animals. **There is a story: An innocent virgin princess got married and enjoyed her first-night. She asked her husband "Common masses also do this ?", "Yes" replied her husband. "They must be stopped" She snapped immediately. This is the mentality of exploiter community. In some parts of India Dalits are not allowed to carry their marriage procession on streets. Dalits are not allowed to ride on horse and not allowed to wear turban. Dry lavatory system deliberately prevails to compel dalits to carry Arya-Brahmin feces on their head.**

While partitioning India, Brahminists of India to take vengeance upon Dalits for their crime to elect Dr. B. R. Ambedkar for constituent assembly gave Dalit majority and Muslim minority provinces such as Jassor, Khulana, Barishal, Faridpur, Dhaka Maimansingh province and Buddhist majority Chittagong hills area to Pakistan. Converted Arya-Brahmins of Pakistan persecuted these Dalits in Pakistan. As a result they had to flee back to India where Arya-Brahmins riding government of India persecuted them in various ways. They were dispersed in remote areas throughout India. Their genocide were committed in Morichzapi of west Bengal. They were made food of Sunderban tigers. Defying all international rules, they passed a black law which prohibits Bengali Dalits migrated to India even to apply for Indian citizenship. Anybody from the world can obtain Indian citizenship but not the Bengali Dalit refugees. Bengali Dalit refugees are hunted and thrown into no man's land at Bangladesh border. While entering either side of the border they are shot dead. This is continued since last several decades. Such is the height of Arya-Brahmin hatred for indigenous masses.

17. With the incredible development in electronics many of the workmen and professionals are being replaced by robots. As a result, a huge section of masses becomes "not-needed" and worthless eaters. Exploiters have a plan to exterminate over 90% of world population by means of artificially created floods, Tsunamis, earthquakes, wars, diseases created through vaccines and biological weapons such as

AIDS, EBOLA and so on.

4. Word Exploitation System

World exploitation system is governed from behind the curtain by the 13 Zionist Jewish Banking families collectively known as the "Jewish Banking Cartel" or the "Illuminati" which believe in Satanism. Illuminati-Jewish Banking Cartel, through its finance, own or control almost all multinational companies of the world. It is claimed that Rothschild family leads the Illuminati-Jewish Banking Cartel. In every country, they control print and electronic media, all trade unions and all political, social, cultural, religious organizations. Through them they enforce various economical treaties and control every government in the interest of Illuminati Banking Cartel.

Jewish Illuminati Banking Cartel have been creating wars between nations and have been helping both the warring sides financially, weakening them in costly war and enslaving them under heavy debts. It is claimed that all wars so far fought are wars created by Illuminati Jewish Banking Cartel.

Through their economic power they have indebted all nations and all financial institutions of almost all countries. It is claimed that except three countries (Iran, North Korea and Cuba), the Jewish Rothschild control central banks in remaining countries.

Illuminati-Jewish Banking Cartel needed a world-system (aka New World Order) to control all countries through uniform economic rules and regulations and rule them politically. For this purpose they created United Nations, World Bank, International Monetary Fund, Bank of International Settlement and so on.

Every problem whether unemployment, or depriving indigenous masses from their water, land and jungle is directly the result of several memorandum of understanding (MOUs) signed by governments with the Illuminati Banking Cartel controlled multinational companies. The GATT, etc treaties signed by the puppet leaders of the counties have made their country's

constitution meaningless since according to these treaties no law of the county or country's constitution will come in the way of provisions of the treaty. In India no land ceiling law is now effective as the special economic zones (SEZs) can have thousands of acre land for their economic unit.

United States, NATO is their military and CIA is their subversive tool through which Illuminati Jewish Banking Cartel subdue or topple resisting governments. Countries are forced to give access to their natural resources to the Illuminati Banking Cartel controlled Multinational companies at their terms.

Israel is creation of Rothschild (the head of Illuminati Jewish Banking Cartel). British government had promised Rothschilds through Balfour declaration its commitment to create Israel in Arab land Palestine. Banking cartel, as had brought America into world war II as a British ally for which Israel was promised and later created. Israel receives heavy financial, military aid from United States. No UN resolutions passed against Israel's war crimes and human right violations could be implemented. Nobody could force Israel to reveal its nuclear facilities for international inspection. Israel receives heavy compensation from Germany for so called Jewish holocaust in 2nd world war which is questioned. Under the dictates of Illuminati Jewish Banking Cartel many countries have passed a law and accordingly jailed authors and activists who questioned Jewish holocaust. According to these laws even questioning Jewish holocaust is made crime. In fact, most governments are little more than front organizations for the Illuminati Jewish banking cartel.

All ruling parties of India have been serving Illuminati Jewish Banking Cartel controlled multinational companies. Betraying Bhopal Gas victims, both the Congress and BJP have helped Anderson to flee from India and ensured that he will not receive any heavy punishment.

The ultimate aim of Illuminati-Jewish Banking Cartel is to rule the

world according to the tenets and dictates of Talmud which is Jewish Version of Indian Manusmriti. Under this system the exploited and oppressed masses (Bahujans) of the world will be reduced below the level of animals. (Please read our English Book Impending Satanist World Order, written by Sheetal Markam)

5. Basis of Exploitation System

1. Zionism Brahminism and Satanism (ZBS) :- The core of every exploitation system is man's laziness, greed, jealousy and envy. The Satanism, Zionism and Brahmanism are names of the same phenomena which has developed out of man's laziness, greed, jealousy and envy. These feelings and emotions are found among every strata of the society. Rich or poor nobody is exempted from them. A lazy person does not like to work. He wants easy ways to fulfill his needs, no matter how immoral ways they are. He becomes a parasite, living on the labors of other persons.

According to ZBS the strongest has the right to rule and enslave the weak. ZBS approves laziness, greed, jealousy and enmity and preaches that betrayal, treachery, falsehood (Sam, Dam, Dand, Bhed) everything is allowed to become powerful. Powerful rules or destroy the weak. This is what they call the law of nature. Thus ZBS approves that the master has every right to treat weak brutally because he is powerful enough to do so. Satanism boasts that it is helping process of natural selection by eliminating weak and thus creating a society of stronger and smart people capable enough to deceive each others.

Man goes after greed because he falsely believes that by acquiring more wealth and more amenities he will become happy. But there is no limit to man's greed. There is always someone wealthier than him. He may develop envy and enmity for wealthier become unsatisfied and unhappy and would indulge into conspiracies against the wealthier. The result is bloodshed. Every exploiter live in constant fear of being toppled.

Even if you throw one ruler or a particular form of government

several thousand times, every time there are always lazy and selfish persons full of greed, jealousy, and envy to replace the earlier. Therefore, unless the falsehood of laziness, greed, jealousy, envy and SZB is not fully realized, there is no escape from the exploitation system. There will be an unending continuous struggle for power by every dirty means by the parasite communities or groups. Poor and weaker are bound to be crushed in severest possible ways.

2. Usury or interest :- Exploitation system is based upon usury or charging interest on loaned money. Following story explains how a system based on usury creates an exploitation system :-

On a small remote island natives used to barter. Agricultural produce being seasonal, farmers may not have produce ready for barter. Similar was the case with other natives. Therefore, they were desperate to find a solution.

Accidentally, a man reached to their island on a boat. He told natives that he can loan natives on mortgage his plastic coins that represent gold in his box. With these plastic coins, they can buy each other's goods. Natives agreed. Natives observed that after payment of loan installments they have lesser coins. Since the total debt is always greater than the loan received, if all natives pay every coin they have, they will not be able to get rid off their loan. The usurer appointed strongly built armed men for loan recovery. The usurer soon brought the residents into his debt-slavery and became a tyrant of the island. The best kept secret of the usurer was that the box did not contain any gold but household things.

Because of interest the total debt is always greater than the money loaned out, therefore inflation (price hike) is bound to occur. Workers agitate and their salaries are increased. To pay increased salaries more currency is printed leading to more price hike. This process increases number of poor making their life more miserable.

What needed is system free of usury and interest.

3. Unjustified profit :- Industrialists pay little to workers keeping

large portion of profit with themselves. This leads to exploitation of workers. Unjustified profit may also be extracted by creating artificial scarcity, monopoly production, or consensus among the producers to extract unjustified profit from the buyers / consumers. It creates severe economical disparity in society.

4. Centralized State :- The State always has caste system like hierarchy which itself is an exploiting class. It is anti-people mechanism. Nobody likes to visit a police station, Judiciary and the the bureaucracy offices. Centralization of state leads to dictatorship.

5. Dependency Mentality of Masses :- Apart from greed, jealousy and envy, which is basis of every exploitation system, toiling masses particularly have mentality of dependency. There is built in helplessness in their character. Therefore, anybody who promises them good future, they rally around him and consider him as their savior. Masses are always dependent on some leader, saint or anybody who pretend to fight for them. Common masses lack courage and ability to take control in their own hand.

Lord Clive of East India Company, after wining battle of Plasi entered into Murshidabad city with his 200 European and 500 Indian (Bahujan) soldiers. According to him, millions of people were gathered both the sides of road to see them. Clive feared, these people could have easily destroyed them attacking with sticks and stones. But people lacked intention and courage. (Bharatiya vidya Bhawan, The History and Culture of the Indian people, Vol.10 p.3)

Masses never have inclination to understand the nature of exploitation system, how to establish system based on social Justice. What abilities they have to develop in order to control their struggle against exploitation and oppression.

Bahujan masses can not establish exploitation free social system or even prevent their brutal victimization if they do not develop strong determination and abilities to control their struggle. Masses themselves are responsible for their misery and

nobody else. A lion is bound to it the lamb.

6. Learned Helplessness in Masses :- When people find no escape from their miserable situation, in the beginning they develop anger and then frustration and finally accept their miserable situation as an inevitable fate.

This phenomena of leaned helplessness was experimentally demonstrated by psychologist Seligman in his experiments. He divided dogs in two groups. First group of dogs were kept in a chamber. A bell was sounded and Electric shock came through the floor. Soon dogs learned to jump other shock-proof side of the chamber as soon as the bell rung. Dogs in second group were kept in a chamber where there was no shock-proof side. Therefore suffering from electric shock was inevitable. These dogs cried pathetically as soon as bell rung and suffered. They developed learned helplessness to such an extent that when they were put into chamber having shock-proof side, they did not attempt to Jump over the side. All efforts to motivate them to jump to shockproof side failed. They remained in shock giving side. **Therefore, people who develop learned helplessness in them do not respond to any attempt to bring them to the path of Bahujan mission.**

7. Lack of foresight among Bahujans :- Objective evaluation of current situation is precondition for developing a foresight. Without foresight you can not apprehend what would be the future outcomes. Lack of foresight springs out of dependency mentality. Person suffering with dependency mentality can not evaluate any situation objectively because he expects every thing such as thinking, planning, action etc to be done by the leaders and not by himself.

A mother is inclined not to see faults in her child because she loves him so much. Similarly a Bahujan with dependency mentality is afraid of every responsibility therefore he not only avoids rational assessment of situation but subconsciously ignores glaring evidences of betrayal by fake leaders or contradiction between what the fake

leader says and what he does.

To give a practical example, a leader of Bahujan white-collar employee's organization, since last several years is only talking about launching a Jan-Andolan (a people's movement) about which neither he ever made any preparation nor he has ever launched any such agitation. He did not even explained what will be nature of this so called Jan-Andolan. Not a single member of his organization dared to ask him the action plan or a blue-print of this Jan-Andolan.

Thus, Bahujans without foresight accept blindly what their leader says and regularly fill his coffer by contributions, while remaining themselves in the illusion of mission work being done.

Part II

Fake Struggle in a Nutshell

A Fake Struggle is any struggle, activity or practice being carried out which instead of any progress, wastes money, time and energy of Bahujan masses and may even physically harm them, consequently weakening them and benefiting the exploiters.

The Bahujan masses are under the illusion that so called struggle being carried out by their leaders is genuine. The exploiters to strengthen this illusion make propaganda through their Manu-Media that such struggle being carried out by Bahujans is a genuine and encounter it as if it is a real threat.

It serves two purposes 1) Keep Bahujans under illusion and 2) derive sadistic satisfaction through vengeance against Bahujans by inflicting them physical and economic harm.

Examples of fake struggle or activity

Few examples of fake activities, or struggles are as under.

1. Future Promises

Whenever Babasaheb Dr. B. R. Ambedkar talked about any problem of Bahujan masses he simultaneously presented a complete action plan of how the problem will be solved. **Fake leaders on the other hand never have any blueprint for solving any of the problems of the exploited and oppressed masses. Today's fake party leaders put the solution in future such as "When we will come to power we will solve this problem".**

We have gone through the programs of all major political parties, peasants and workers organizations, student and youth organizations. Nobody has a blueprint to solve any problem in present. All talk about future.

In the cartoon above, a fake leader riding the donkey has a bunch of grass tied to a stick well ahead of the donkey. The bunch of grass is "Bright future Promises" (an attractive program of an organization which can never be achieved). Donkey represents duped workers of his organization who carry the fake leader in the hope of bright future. Fake leader has bag of Dollars earned through behind the curtain deals with the exploiters. He is being enrich by the labour of

the duped workers. **Because of their dependency mentality, cadres are not capable of understanding how the promised programs can never be achieved or the so called actions are fruitless.**

2. No Progressive Empowerment of Masses

All programs of an organization should be presently achievable, and should be empowering masses in progression. More stronger the masses become more effectively they will launch their struggle against exploitation and oppression.

Fake leaders can not strive to empower masses in progression because this requires 1) to study the problems from its every angle 2) will have to develop mechanism and infrastructure at very grass root level to solve the solvable problems. Doing this is suicidal for their selfish interests :- i) self sufficient local leadership will emerge at very grass-root level. They may no more need their fake leaders. ii) The infrastructure created to solve the problem will consume most of the economical resources and very little or nothing will come to the coffer of the fake leadership at center.

Therefore, no fake leader will go for creating infrastructure to solve presently solvable programs. He would be happy in keeping his members trapped and duped under future promises as shown in the cartoon.

3. Lip Service only

Bahujan organizations in general offer only lip service and do nothing to help the Dalit-Bahujan victims of Arya-Brahminist violence. They will only issue statements, speak in assembly or in parliament. At the most they will visit the victims and address press conferences, organize a public meeting, or take out a procession.

After a week or two the matter subsides. The offenders are released on bail. They start threatening the victims and the witnesses. The victim is drained of all his economical resources in attending court dates and paying lawyers their heavy fee. He

looses his daily wages every time he visits the court. Ultimately he is broken psychologically and economically.

When Bahujan victims realize that there is no escape from Arya-Brahminist oppression they develop a tendency to passively suffer from it as their inevitable fate. They develop learned helplessness. Then if somebody shows them effective solution to escape from their oppression, they do not accept it.

Bahujan masses who develop learned helplessness are indifferent to any attempts to retaliate the injustice. It is almost impossible to bring them to the path of struggle. For their such pathetic state fake Bahujan leaders are responsible.

4. Lectures in place of Meaningful action

Fake leadership is not capable of launching a meaningful action that empowers masses in progression without harming masses physically or economically. Fake leaders only talk. They deliver only lectures in their public meetings, processions or in debate or discussion. What is the use of their lectures on the topics which we are listening since our very childhood.

Suppose a young man desirous of marriage is very expert in delivering excellent romantic dialogs but is sexually impotent. What is use of such young man for the girl he proposes ? The fake leaders are not much different from the impotent young man in example because both can not bring desirable results.

5. Lack of Self Defense Measures

Because of Babasaheb Dr. B. R. Ambedkar, Dalits are more politically aware than other segments of Bahujan communities. Therefore Dalits always try to bring OBC and other communities into their struggle for social justice.

Other communities have basic logic "if you can not protect yourselves from Arya-Brahminist violence then how can you protect us ? They are 100% correct. Political awareness alone is

not sufficient. One must develop ability and mechanism to protect the community from Arya-Brahminist violence and oppression.

Present Dalit movement is a complete failure because they do not have an effective Self-defense youth force to protect themselves. Fake leaders will never develop effective social defense measures at grass root level because :-

1. All fake leaders directly or indirectly are stooges of Arya-Brahmin leaders. Some directly serve them (Pre-Election alliance) while other make post-election alliance with exploiters. Some leaders concede to Arya-Brahmin leaders because of fear of CBI.

2. Stooze leaders know very well that if they raise community self defense mechanism, Arya-Brahminists will prefer and promote his rival stooze Bahujan leader. His political career will be at stake. Therefore fake leaders do only lip service.

3. Creating self defense mechanisms at grass root level means creating an infra-structure capable of fighting against injustice. Such infra-structure will have effective local leadership which may become threat to central leadership. How fake leaders can transfer leadership power to grass root levels ?

4. Creating any genuine infrastructure to solve any problem would consume most of the local resources and very little or no money shall come to the coffer of the fake central leadership.

6. Fake Leaders keep Bahujan Masses oppressed !

Leaders of Bahujan organizations need atrocities on Bahujan masses unabated so that Bahujans automatically come into their organizations and support them by every means. In Bihar, Ranvir Sena which is armed organization of Arya-Brahminists and which has been killing Dalits, OBCs and Adivasis were protected by all parties in rule. As per reports, BJP, Congress, RJD etc party leaders had friendly connections with Ranvir Sena leaders.

Leaders raising slogan of Sarva Samaj, fearing loss of Arya-

Brahminist votes, will not take any meaningful action against Arya-Brahminist oppressors.

7. Fake Leaders have no priority programs !

Because fake leaders are only interested in extracting as much money and other benefits they can extract by duping the Bahujan masses, they have no priority of issues to work sincerely upon.

Therefore, every time the subject matter of their talk is different because topics are meant only to be lectured and not to be implemented. Several years ago in Nagpur, one organization of white-color employees had special series of lectures on the survival problems of Bengali Dalits refugees living since several decades in India. Except lectures, nothing was done. Lot of donation etc was extracted from the Bengali Dalits. The moment conference was finished the matter was finished like the proverb "Raat Gayi Baat Gayi". Such is the insensitivity of fake leaders.

Fake leaders do not decide their work priorities on issues which can be solved with abilities and resources of the organization, because this involves doing lot of research, developing new skills, taking risks and utilizing all economical resources to solve the problem. This is too much for a fake leader.

He has the ability to deliver lectures, ability to dupe the masses and has tons of cowardice.

8. Exposing Exploitation and Oppression Verbally

Leaders, activists and intellectuals feel pride in exposing the exploitation, oppression and evil plans of the exploiters. Through their lectures, articles, TV or Radio shows and internet blogs they go on giving details of such events - **without presenting any effective and fool-proof action-plan which masses can implement against such exploitation and oppression.** At the most they say - people should oppose or revolt. They forget that masses are dependent upon leaders for any action against oppression. Leaders are fake. Then how

can dependency stuck masses themselves start such a struggle or revolt ? **Such is the intellectual bankruptcy of these intellectuals, fake leaders and the activists. Such activists or intellectuals usually are treated as heroes among the Bahujans but in reality knowingly or unknowingly they are rendering valuable service to the exploitation system. We explain this as under :-** When we read, see or hear about victimization of Bahujans and nobody doing anything then we get angry. Anger soon converts into frustration if nothing can be done. Severe mental tension is created. To get rid off this severe mental tension, our mind creates rationalization that such victimization is a natural fate of Bahujans and we accept it as inevitable. **This mental phenomena in psychology is called as cognitive dissonance.** Because of this phenomena we have accepted so many evil things as normal and unavoidable. For example, we consider corruption is everywhere, nobody does anything against it hence unavoidable. Therefore we give bribe accepting it as normal phenomena. Now we have accepted that leaders are meant for corruption. We are neither angry nor surprised for such incidents. We take police brutality, fake encounters and third degree torture in police custody as unavoidable. Even our TV serials and movies glorify such acts. Any girl entering into film industry assumes that a casting couch is unavoidable and a norm.

Therefore, when we talk about any victimization we must compulsorily present an implementable action plan which the common masses can implement themselves. Arya-Brahmin perpetrators must be harmed in all possible ways. Then only we can hope of preventing exploitation and oppression.

9. Reacting in self-defeating manner

Usually Bahujan organizations suffering with herd mentality react in a self-defeating manner. Our money, time and energy is wasted. People get physically harmed and suffer for a prolonged period. For example, when we call a procession police may start cane charging.

Several will get injured. Police indiscriminately file cases against under several sections. Many youths are prevented from getting a job because of these cases. Court cases are dragged years after year.

Arya-Brahminists leaders or their agents infiltrated in the movement will burn the government buses, railway coaches and so on. Ultimately these losses are recovered from Bahujan masses by imposing more tax. Arya-Brahmin officers may get commission from buying new buses and from repair works.

People sat on hunger strikes for months without any result. Peaceful hunger strikers are attacked by police. Many go for "fill Jails" movements. Only people will be harmed because people will be released after filing cases against them. In America, jail inmates compulsorily work in the factories for meager wages. Same thing can happen in India as well.

What we should have done instead is : -

In every Dalit Bahujan locality in a social utility place we could have arranged meeting of citizens (without any loud speaker), condemned the incident, and collectively taken an oath to :-

1) boycott Manuist newspapers, 2) boycott all paid dish TV companies 3) boycott products of companies who support Manuist organizations. 4) Defeat the political party and the persons responsible for the action.

Bahujan masses are easily provoked by insulting statue of Babasaheb Dr. B. R. Ambedkar, Periyar, etc. As a result communal tension is created between the masses who are followers of Dr. B. R. Ambedkar and masses who are under the influence of Arya-Brahmin religion. From such conflicts only Arya-Brahminists are benefited.

The proper action is to clean the statues and start campaign to expose why Arya-Brahminists have provoked this act. Bahujans should make aware Bahujan section under the influence of Arya-Brahmins who have committed the provocative act that how the Arya-Brahminists have deprived this section of their rights.

10. Conferences of Fake Leaders

Several Bahujan organizations organize huge yearly conferences. Members and sympathizers gather from different places of country spending their money, time and energy. In these conferences only lectures are delivered. We have been listening such lectures almost since our childhood. What is the use of such lectures at the cost of spending millions of rupees, time and energy of thousands ? These lectures do not harm the Arya-Brahmins or their exploitation system.

No doubt, the participants of such useless conferences are temporarily charged with the feeling of power. In night, street dogs also gather and feel powerful and bark at anyone who is in the sight to show their power. Next morning these dogs are again helpless, bitten with sticks or stone pelted.

The same amount could have been spent on victimized Bahujans. For example, Dalits of Mirchpur, Gohana and other places of Haryana were killed, their houses were burned and survivors fled out of the village. These Dalits since last several years have been living in Delhi. They are not allowed to return back to their village. Even no person from the village is allowed to speak to these Dalits residing in Delhi. Anybody talking to them will have to pay penalty of several thousands to the Panchayat of the oppressor community.

When we have hundreds of such cases before us how can we take luxury of throwing away millions of rupees in these worthless conferences and not spending a single penny on these Dalit-Bahujans. Such is intellectual bankruptcy of Bahujan cadres.

These conferences are arranged to show exploiters leader's strength so that from behind the curtain, deals can be made to divide votes in election. Deals can be made that masses duped by the leader will be prevented from joining any meaningful struggle.

Fake leaders in conference make hot lectures which gives impression that Bahujan mission is progressing ahead. **Participants lack the ability to perceive that speeches of the fake leaders in the conference are not going to harm exploiters or help Bahujans any**

way. Usually leaders organize such conferences to :-

1) charge members of their organization with the spirit of illusionary power so that they are ready to empty their pockets more easily,

2) show numerical strength of their organization to different parties to demand more seats in alliance.

3) to sell themselves at higher price to some ruling party for dividing Bahujan votes selectively to help certain Arya-Brahmins.

4. To make deal with exploiters that participants duped by them will not join any true struggle against the exploitation system.

11. Imposed Arya-Brahmin leadership

Time to time Arya-Brahminist governments to benefit their Arya-Brahmins or multinational companies displace Adivasi and farmers from their land. Adivasi and farmers organize themselves in retaliation. At the very moment Arya-Brahmin leaders such as Medha Patkar etc come and grab leadership and misguide the whole struggle and serve the Arya-Brahmin exploiters. Any struggle led by Arya-Brahmin leadership invariably is a fake struggle.

Many Arya-Brahminist intellectuals posing as sympathizers, also try to lead Bahujan struggle astray. These intellectuals can act as informers for the very oppressors.

The Bahujan masses suffering with inferiority complex gladly accept Arya-Brahminist leadership in their struggle.

12. Reformist movements

No reform is possible in any system of exploitation because, its intention is to keep masses weak and helpless. In spite of that, Arya-Brahmin leaders, and many NGOs usually launch time to time movements to implement a reformist program as a solution. This attempt is nothing but to dupe the Bahujan masses.

How can we forget that there are many attractive provisions in the constitution of the country. But all these provisions that are meant to protect masses are deliberately ignored. There is provision of self rule for Adivasis in Adivasi areas which is never implemented. Arya-Brahmin judges select their own brethren. Stringent laws are rarely applied against Arya-Brahmin culprits, On the contrary Bahujans are framed in false cases. Which law or rule should be relaxed, ignored or strictly implemented is done selectively looking at the caste of the person. **What is the use of the so called Jan lokpal which was hyped by media as the savior of mankind. All such movements are simply to fool the Bahujan masses.**

13. Unproductive Ceremonial functions

It require no special skills in collecting money from Dalit-Bahujans for 14th April etc ceremonial functions. Lectures, entertainment programs are arranged. Considering whole Dalit community, an enormous amount is spent on these functions. This pomp and show is of no use for victimized Dalit-Bahujans.

We could have celebrated these occasions with most simplicity and diverted most of its amount in helping victimized Dalit-Bahujans and empowering them.

14. Priests and their harmful rituals and traditions

According to Babasaheb Dr. B. R. Ambedkar, priest is the evil genius who has killed rational thinking (Samma-Diti) of the masses. Priests have converted every religion a conglomeration of superstitions and costly rituals upon which the priest feeds and exploitation system thrives. Bahujan masses on the other hand are broken financially and become rationally bankrupt.

Every festival such as Holi and Diwali puts heavy financial burden on the Bahujans. Many Bahujans have to borrow from money lenders for the marriages of their children. Whatever is mortgaged can never be freed. Many have died of dowry. In spite of these detrimental

effects, no Bahujan leader has even went against the priest and his useless, superstitious, costly social and religious rituals because these leaders can not go against the tide and risk their leadership and incoming flow of money by such superstitious believers.

When a priest has information of every member of your house, about strengths and weaknesses of everybody, he can misuse the information to benefit somebody which might harm your family members. Priest is just like a spy in your family.

15. Indulging in worthless issues

Every agitation Should empower Bahujans while weaken the Arya-Brahminists. Indulging in worthless issues weakens Bahujans and strengthen Arya-Brahminist exploiters.

The fake leaders and agent provocateurs of the exploiters, try to lead struggle astray by dragging masses into worthless or self defeating issues. For example :- 1) whether to call Scheduled Tribes as Adivasi or not, 2) Vipasyana or no Vippasyana and so on. With such issues their intention is to create disputes among the sections of Bahujans and divide them. What difference will it make if we call ourself Adivasi or Tribe ? Is it going to stop our victimization, exploitation and oppression ? If Vippasyana makes a person incapable of fighting against the exploiters, then why to waste our time in making them capable. Instead why not use our valuable time and energy on our priority issues such as protecting masses from Arya-Brahminist victimization and oppression.

Agent provocateurs may ask you to start agitation to fight against the rituals and ceremonies of Arya-Brahmin religion being performed in Indian Army. They may ask you to agitate against unique identification (UID) known as Adhar. Though these issues are important theoretically, agitation on these issues only drains your money, time and energy and will also cause physical harm. Why to waste our energy and time on issues that weaken ourselves. We should rather concentrate our energy in protecting and empowering

Bahujan masses in progression which is our highest priority task.

16. Admirers of Arya-Brahminist Idols

Bahujans must be careful about anybody giving an impression of being "progressive " and a well wisher of Bahujan masses but simultaneously praises Gandhi, Nehru etc Arya-Brahminist, Manuist idols and with false arguments present them in an acceptable form.

Either such persons are ignorant or shrewd enough to instill Manuist poison in the minds of Bahujans step by step. Do not trust such persons no matter which organization they belong to. If they are really ignorant and sincere after knowing reality of these idols they will mend their ways and start condemning Gandhi etc Arya-Brahminists for their Anti-Bahujanist acts. If they do not mend their ways Bahujans should treat such persons as per their merits.

These days fake communist students leaders have started singing "Hame Chahiye Azadi, Ambedkar Wali Azadi, Gandhi Wali Azadi" and so on. They are putting Gandhi and Ambedkar on same side. Such communist student leaders glorify Hindu god Rama, Brahmin Tulsidas, Kalidas etc.who said "Shudra, Ganvar, Pashu Nari, Sab hu Tadan Ke Adhikari". What is the height of intellectual bankruptcy of followers, sorry, Bhakts of Ambedkar who are duped when Ambedkar's slogans are chanted. Nobody told them that keep your Gandhi, Nehru, Rama, Tulsidas and Kalidas with you, we have already forsaken them. If you want Ambedkar first leave your idols in your home, do not bring them here.

We must ask these fake student leaders to start agitation to implement reservation and stop victimizations of SC,ST, OBC students; agitation to implement womens' reservation bill ensuring quota for SC,ST, OBC and minority community women; to distribute immense wealth Hindu Temples on Hindu farmer families who have committed suicide; to start agitation to free Devdasis from Hindu Temples and so on.

Fate of Various Bahujan Organizations

We do not expect birds to swim under water and fish to fly, because we know their limitations. Similarly, if we analyze every organization their limitations, we shall never hope beyond their capabilities.

Imitating Arya-brahminist Indira Gandhi every leader concentrated dictatorial power in his own hand. In order to retain his monopoly, he never allows anybody to become stronger. All persons around him are "Yes men". Such organizations can not prosper beyond the state of the party dictator. For Arya-Brahmin votes one such organization has clubbed together exploiter class and exploited masses and started preaching sermons of "Sarva Samaj".

There are white collar organizations of employees who are bound by service rules hence can not cross a specified limit in their agitation. There are Bahujan leaders who are known stooges of Arya-Brahmin leaders. There are also leaders who talk against Arya-Brahmins but support them after elections. There are organization leaders who from behind the curtain make deal with exploiters to divide votes in elections and ensure them that masses duped by them will never join real struggle. Thus in the end they all are friends of Arya-Brahminists. How all these organizations can fight against the exploitation and oppression of the masses ?

There was a time when Bahujans were prevented to vote. When Bahujans started insisting upon their right to vote, EVM machines are brought to manipulate whole election result. Arya-Brahminists have already brought under their control judiciary, bureaucracy, election commission, police, CBI, etc institution making constitution of India meaningless. In spite of glaring example against EVM machines, EVMs will stay shamelessly. Very soon whole electioneering system will collapse and Arya-Brahminists will shamelessly impose their Hindu-Rashtra constitution. Under this situation all political party leaders will become irrelevant.

Part III

Genuine Struggle in a Nutshell

Genuine struggle is any activity that strengthens and empowers Bahujan masses in progression with minimum possible resources, efforts and almost no physical harm; while weaken the Arya-Brahminists and their exploitation system.

Genuine struggle for social Justice can be launched at three levels :- 1) Personal Empowerment, 2) Family Empowerment and 3) Social Empowerment. **First two are of vital importance because they create solid foundation for social Empowerment. They are almost free from any interference of exploiters or their agents.**

Personal Empowerment

1. Health promoting Habits

Primary concern of every person should be to keep his body healthier. Exploiters try to keep you physically, psychologically as well as economically weak. Medical and pharmaceutical industry can run only if you are constantly suffer with with diseases such as cancer, blood pressure, diabetics and so on. Therefore, any attempts to produce permanent cure to these diseases are violently opposed. Alternative therapies are condemned and their scientists are even killed. **By keeping yourself healthy you automatically weaken exploiters economically.**

Sound health is result of healthy habits :-

a) **Avoiding toxins and harmful substances :-** They are available in our day to day use items. For example soap and hand wash that we use contain harmful substances. Floor cleaning liquids,

mosquito repellents, insecticides etc are more harmful than they are of any use. The items made of plastic contain harmful substance known as BPA. The list of such substances and items is very long. Do not buy these items, instead use indigenous harmless methods. **They will save you lot of money. Your will not make exploiters rich.**

b) Avoiding toxic food :- The harmful food is genetically modified vegetables, GMO seeds, GMO fruits, GMO animals and birds. We should carefully avoid them and use organic food which is naturally grown without use of any pesticides. The animals should not have given hormone injections to increase their growth, to increase their milk etc. These hormones come into animal flesh and milk and milk products which are detrimental to our health.

We must keep ourselves away from chemically processed foods such as junk-food, trans-fats (Dalda Etc), chemically treated refined oils, coffee, and soft drinks of all kind. They are not only harmful to our health but are made addictive.

c) Eat healthy food :- Healthy food is a food that help you to maintain your body slightly alkaline which is between pH level of 7-8. Below pH level 7 the body becomes acidic and may develop all sorts of ailments. Most of the green vegetables are alkaline.

d) Proper exercise and rest :- It is most important that you have regular exercise in morning at least for 30 minutes. **The Rule of exercise is never let your body go out of breathe. The golden rule is you should enjoy the exercise and not strain your body to the extent that it produces stress. Stress leads to secretion of stress hormone Cortosal detrimental to physical and mental health.**

You must provide adequate rest so that your body has enough opportunity to recover and grow. Four day exercise a week can be a good choice. Similarly, at least 8 hour sound sleep is must for better body functioning.

2 Keep yourself free from stress

Stress is not only detrimental to your body but also to your mental health. Stress drains your mental resources and produces bodily changes that upset your digestive system. You can remain healthy with little food but can not remain healthy when stress is your constant companion.

In order to avoid stress, you will have to learn effective strategies to deal with different situations that produce stress. First of all, make a list of all types of persons and situations you have to deal with. Secondly think rationally about what is the most beneficial way of dealing with such persons or situations. **Once you decide strategy in advance, for each type of person and situation, you will not behave irrationally in a harmful way.** It will keep yourself free from tensions. To make the point clear following example might be useful :- Mr. A went to a barber shop for hair cut. After hair cut he asked how much he has to pay. Barber said Rs. 20/-. Mr. A was surprised of such a low amount. Next moment barber said "you regularly come and do not know that hair cut charges are Rs. 50/-. Mr. A said sorry and calmly went away. Henceforth he never went to that barber.

Barber lacked insight how he should talk to his customers. We talk to our friends, to our servant, to our boss, to our children in different ways. We do not mix roles. For example we can not talk with our boss the way we talk to our servant and so on. Barber should not have mixed his roles. Mr. A learnt a lesson that he should never become frank with persons like barber, should limit his talk to the task only. **Dalit Bahujans are unsuccessful in their business and many walks of life because they do not have a rationally developed pre-strategy to deal with different persons and situations. As a result] they unnecessarily quarrel, indulge in useless unproductive and harmful arguments. The result is tension.** One should think not only of immediate consequences of his action but also in long run.

3. Avoid Allopathy medicine

Always take second and third medical opinion before taking any

allopathy medicine. Allopathy medicines should be used only in an emergency situation until the emergency situation is remains. It has become clear that allopathy only is concerned with suppressing symptoms of a disease. It is not concerned to address the root cause of disease. Disease develops if your body has toxins. Acidic body soon becomes toxic. Therefore, one should get rid of toxins by eating healthy alkaline foods and adopting a healthy lifestyle.

Allopathy medicines give only temporary relief :- While you are cleaning your room, if somebody is throwing dirt into your room. What you will do ? Certainly you will stop cleaning your room and first ensure that dirt is not being thrown into your room. Thus, you are dealing first with the new situation. In the same way, disease symptoms is body's attempt to get rid of toxins from the body. But when you throw allopathy medicine into your body, which itself is a toxin, body stops dealing with previous toxins (so disease symptoms disappear) and starts dealing with the new toxin which is the allopathy medicine. Disease symptoms disappear but disease is suppressed to deeper level that produces more harm in long run. Therefore, less you take allopathy medicine more healthy you will become. You can remain healthy living with healthy habits.

4. Stay Away From Harmful Gazettes

1. Microwave Oven :- Microwaves rip apart the molecular bonds that make food to be “food.” Microwave ovens hurl high- frequency microwaves that boil the moisture within food and its packaging by whipsawing water molecules dizzily back-and-forth at more than a billion reversals per second. This frantic friction fractures food molecules, rearranging their chemical composition into weird new configurations unrecognizable as food by human bodies. By destroying the molecular structures of food, the body can't help but turn the food into “nuclear waste.”**Did you know that microwave-treated water won't sprout seeds ? Russian researchers have found decreased nutritional value, cancer-making compounds and brain**

damaging radiolytics in virtually all microwave-prepared foods. Eating microwave-prepared meals can also cause loss of memory, loss of concentration, emotional instability, and a decline in intelligence, according to the research. The Russian scientists also found decreased nutritional value – or significant dimming of their “vital energy field” – in up to 90% of all microwave-prepared foods. In addition, the B complex, C and E vitamins linked with stress-reduction and the prevention of cancer and heart disease – as well as the essential trace minerals needed for optimum brain and body functioning – were rendered useless by microwaves, even at short cooking durations.

Microwave usage has been found to lead to lymphatic disorders and an inability to protect the body against certain cancers. The research found increased rates of cancer cell formation in the blood of people eating microwave-cooked meals. The Russians also reported increased rates of stomach and intestinal cancers, as well as digestive and excretive disorders – plus a higher percentage of cell tumors, including sarcoma. Other side-effects of microwaves include: 1. High blood pressure, 2. Migraine, 3. Dizziness, 4. Stomach pain, 5. Anxiety, 6. Hair loss, 7. Appendicitis, 8. Cataracts, 9. Reproductive disorders, 10. Adrenal exhaustion, 11. Heart disease, 12. Memory loss, 13. Attention disorders, 14. Increased crankiness, 15. Depression, 16. Disconnected thoughts, 17. Sleep disturbance, 18. Brain damage. Eating microwave-damaged foods can lead to a considerable stress response in the body, and thereby, alter the blood chemistry. Therefore, use of microwave ovens is banned in Russia and many other countries.

2. Risks of Ultrasound Scans:- There are cases of women recorded by the Association for Improvements in the Maternity Services (AIMS), England, who aborted their perfectly fit and healthy babies as a result of misinterpreted scans. It is almost impossible to estimate how many women went through similar ordeals since most of them are not reported. Millions of women around the world, without being

aware of the potential health hazards of ultrasounds, are participating in the largest medical experiment of all times. Their babies are the guinea pigs in this experiment. They become vulnerable to external and internal harmful influences when their delicate electromagnetic fields are distorted, misaligned or damaged by highly concentrated doses of ultrasound; exposure to that is neither natural nor suitable for any human being.

An Ultrasound scan should only be considered if a woman suffers localized pain or complications for which a doctor or midwife cannot find a plausible reason.

5. Say No to Vaccines

Various vaccines contain Sodium Hydroxide (caustic soda, soda lye.) can burn eyes, skin and internal organs. Can cause lung and tissue damage, blindness, and fatal if swallowed. Formaldehyde effects the nervous system and cause cancer. May cause insomnia, coughing, headaches, nausea, nosebleeds, and skin rashes. There is no safe level of formaldehyde to be ingested. Hydrochloric acid can destroy tissue upon direct contact. Thimerosal is a mercury derivative and causes brain and liver damages and cancer. Melissa Ross revealed documents that prove the CDC knew Thimerosal used in Measles vaccines was linked to autism and deliberately covered it up. Phosphates suffocate all forms of aquatic life. Aluminum causes tangles of nerve fibres, leading to Alzheimer's Disease. Polysorbate 80 is linked to infertility in mice. Methyl mercury, MSG, carbolic acid (phenol), mercury, are other poisons. Decomposed proteins can cause botulism, salmonella or other types of body poisoning. Vaccines contain decomposed protein taken from pustules on sick animals or putrefied eggs mixed with deadly drugs.

Authorities on vaccination agree that vaccines are designed to cause a mild case of the diseases they are supposed to prevent. But there is no way to predict whether the case will be mild, severe or deadly. Because vaccines are all poison they do damage in 100%

cases. The damage ranges from sudden death to chronic diseases in later years. Repeated, vaccination exhausts the immune system, opens the door wide to all kinds of illnesses including AIDS. Studies showed post vaccine encephalitis i.e. brain damage.

In an article in Science, March 4, 1977, Jonas and Darrell Salk warn that, “Live virus vaccines against influenza or poliomyelitis may in each instance produce the disease it intended to prevent. The Spanish influenza epidemic of 1918 was caused by vaccinations.

The vaccine becomes a time bomb in the system, festering as what are known as “slow viruses”, which may take ten to thirty years to become virulent. Many vaccines also cause other diseases besides the one for which they are given. Such as syphilis, paralysis, leprosy, cancer, spinal meningitis, blindness, tuberculosis, two to twenty years after the shot; arthritis, kidney disease, nerve damage, heart disease, heart failure sometimes within minutes after the shot and sometimes several hours later.

Dr. W. B. Clarke of Indiana, finds that “Cancer was practically unknown until compulsory vaccination with cowpox vaccine began to be introduced. I have had to deal with at least two hundred cases of cancer, and I never saw a case of cancer in an not-vaccinated person.”

Vaccination causes children to grow up with physical, mental and emotional disabilities of varying degrees. In Ontario, it is recommended that infants receive up to 24 injections before age 1 on a baby body with a barely- formed immune system. It's no wonder people drop dead after the shots.

For more details read our book 'Impending Satanist World Order'. It is available free at our website :- <https://www.bahujanmarch.org>

6. Do not take Synthetic Vitamins

Vitamins are always present in natural foods in complex form i.e. with other minerals and vitamins and together they benefit our body.

In fact once a vitamin is separated from the food complex in which it occurs naturally, it loses its nutritional value. Our bodies view the synthetic vitamins as toxic substances that need to be rapidly eliminated. Hence the unusual odor or color of urine you may notice after consuming multi-vitamins.

A stalk of celery or a serving of greens has more absorbable vitamins and minerals than a bottle of synthetic vitamin tablets. Drugs, including over-the-counter medications usually alter your glandular system and will affect your calcium and phosphorous ratios. Prescription and recreational drugs, along with cigarettes, may alter your body's ability to utilize nutrients from food.

Many, but not all calcium supplements contain forms of calcium that are not recognized by your body. Non-absorbable calcium raises blood calcium levels in an unhealthy way which can lead to excess calculus deposits.

One report issued by the University of Tromso in Norway showed that the long-term intake of vitamin D at the dosage of just slightly above the 400 IU recommended amount (many people take as much as 4,000 to 5,000 IU per day !) may trigger a heart attack and cause degenerative joint disease and arthritis. **To obtain vitamin D, the best and cheapest source is sunlight.** The best source of healthy vitamins is fresh fruit, vegetables, legumes, nuts, seeds, etc. Fruits and vegetables also contain important health-essential nutrients known as phytochemicals – nature's food coloring agents.

7. Stay away from Alcohol Consumption

Alcohol is estrogen producing therefore reduces male hormone called as testosterone. Testosterone is responsible for penis erection and other male related characteristics. Thus alcohol consumption can become one important factor in male erectile dysfunction (ED). Alcohol contributes to dehydration of body. Drinking one glass of beer results in the body forfeiting up to three glasses of water. Alcohol is full of calories, and heavy drinking

is a serious health hazard, including premature death due to liver cirrhosis. Chronic alcohol use is detrimental to brain cells and may cause them to die.

The two major alcohol-related brain disorders are alcoholic Korsakoff's syndrome and alcoholic dementia. Korsakoff's syndrome is a brain disorder caused by a deficiency of thiamine (vitamin B1), and major symptoms include severe memory loss, false memory, lack of insight, poor conversation skills, and apathy. In Korsakoff's syndrome, loss of neurons is a common feature, including microbleeding in certain regions of gray matter. In an alcoholic, when Wernicke's encephalopathy appears along with Korsakoff's syndrome, it is called Wernicke-Korsakoff syndrome.

Alcoholics in general have a reduced brain weight compared to nondrinkers. Women's brains are more susceptible to alcohol-related damage than are men's brains.

Chronic heavy consumption of alcohol increases the risk of heart disease, high blood pressure, stroke, various types of cancer, severe liver disease (including liver cirrhosis), sudden death from heart disease, and, for women, risk of miscarriage and fetal alcohol syndrome. Drinking beer, even one drink per day, increases the risk of developing gout in men. Individuals who drank spirits (even one drink a day) also had a somewhat increased risk of developing gout, although the risk was highest among beer drinkers.

Alcohol consumption is costly, it drains your money and disturbs whole family.

8. Develop Rational Behavior

Developing rational behavior is basic requirement of freeing oneself from the bondages of all kinds of fetters. Therefore, exploiters destroy rational thinking of people through religious superstitions and mind enslaving and bankrupting traditions.

One should start question every action before implementing it.

Do not accept anything blindly because someone in authority says so or it is said in a scripture. Do not give any importance to who said a particular thing, what his status is or how the said thing is looking attractive but rationally analyze whether it is useful to you and your family now as well as in distant future. Certain things may look profitable presently but may become harmful in long run. Accepting help from a criminal may be beneficial now but in future he may drag you helping him in his crime which may prove very harmful.

One should not think of its immediate consequences but also consequences in very long run. Therefore developing future insight in all matters is most essential requirement for keeping oneself free from all fetters and troubles.

9. Promoting mental health

Sound mental health depends upon how happy and contented you are in your life, how much meaningful life you are living. Repetitive and monotonous life produces dissatisfaction.

Greed, laziness and envy are enemies of happiness. A greedy and envious person craves for what he does not have. He considers himself poor before a wealthier in spite of he himself being wealthy. There is no end to one's greed. He may be an Industrialist or a king, even he may acquire everything available on the earth he will not become happy. Because, he is afraid that any of his secret rivals may topple him of his position. He strains himself in retaining his position. He is not getting sound sleep because of these worries.

Because he eats plenty of delicious food daily, the food does not satisfy him because his body is not really hungry. Real taste comes from hunger. A hungry person feels an ordinary food most tasty. Body and mind gets satisfied when a hungry person eats food enriched with essential nutrients. This feeling is unique.

Comfort and happiness are altogether different things. Happiness is not contingent upon costly luxurious things.

Children receive joy and happiness from playing with their clay-toys. Happiness comes through good and healthy interpersonal relations. One may experience true happiness from living a meaningful and socially useful life full of Pradnya (Knowledge acquired through rational thinking), Sheel (good moral character), and Karuna (compassion for other fellow beings). With these virtues a person enjoys a meaningful socially useful life and receives genuine respect and love from others.

Development of Pradnya, Sheel and Karuna is result of introspection and realization that greed, envy and jealousy are enemy of happiness (Pradnya).

10. Learning differential Behavior

Learning differential behavior is result of application of rational thinking and developing foresight and derive strategy of behaving with different type of persons in different situations in advance. Thus one knows well how to react in different situations or behave with different type of persons. One who has not developed such strategy in advance, usually is confused and makes wrong moves. Consequently there is unnecessary dispute that may result in conflict, enmity and violence. Such a persons suffer from stress in their life.

We will make the point more clear from our previous example of barber and Mr. A :- Mr. A had developed strategy in advance how to behave different persons in different situations. A person who has not developed an advance strategy would have argued that it is not his duty to remember charges for hair cut. It is the duty of hair dresser to tell his costumers whenever they ask hair cut charges. He has no right to mock his costumers etc. Mr. A knew very well that there was no use in arguing with the barber. Arguments would have lead to injured self of at least one person but usually of both, had wasted time, energy and resulted in mental stress. Barber on the other hand was devoid of any useful behavioral strategy for his profession. He did not know that one has to behave differently with

different persons,. Costumer has to be treated like a costumer not like a friends or servant. As a result Barber was the looser not Mr. A.

Sometimes there is very dangerous situation when one is among rowdy persons who may physically harm him. If he has already developed a strategy of behaving with them then he can escape unharmed from that situation. Therefore, make a list of types of persons you are likely to deal with including member of your family and relatives. Think over what behavior would lead to tense relations and what would maintain these relations in a healthy way. How much close you should be with a particular one or how much distance one has to maintain with others. When you rationally think of everything in advance considering every pros and cons you are developing Pradnya or knowledge through rational thinking.

11. Self-defense Education

Self defense education is must for every person, particularly for Bahujans. Not only one is able to protect himself from dangerous situations, but also he develops confidence and get rid off his inferiority feelings. The best way is to replace normal exercise with the self-defense exercise. Not only your body will get exercise but also you will learn martial art and other skills. There are plenty of videos on you tube that can teach you martial arts and self-defense techniques. One Bahujan skilled in them can teach other Bahujans.

12. First Bahujan Mission, then Organization

Bahujan mission includes all activities that empower them and are essential to bring down Arya-Brahminist exploitation system and establish exploitation free social system based on representation to every community in all fields of life according to their population size. **An activity of a Bahujan mission is any activity which weakens Arya-Brahminists and their exploitation system, lead to progressive empowerment of Bahujan masses and strengthens their struggle against Arya-Brahminist Exploitation system.**

Arya-Brahminists divide and exploit Bahujans belonging to every field such as students, farmers, youths, women, workers of various fields and so on. Arya-Brahminists exploiters have their armed militant organizations such as Ranvir Sena, Bajrang Dal etc to suppress Bahujans with violence. No single organization can answer Arya-Brahminists at all these fields. Therefore, we can never depend on any single Bahujan organization. In order to defeat Arya-Brahminists we need to help all those activities of Bahujan mission no matter who is carrying the Bahujan Mission activity.

13. Contribute money to Mission activity only

If you make money contribution to an organization, then you do not know how your money is being used. Therefore, make money contribution only to the activity of Bahujan Mission and not to organization itself. Bahujans should contribute their laboriously earned money ensuring that it is used on activity of Bahujan mission and not on fake activity or fake struggle which does not lead progressive empowerment of Bahujan masses and weaken Arya-Brahminists and their exploitation system.

14. Devote yourself to a missionary activity

Most of the Bahujan organizations contact their followers or sympathizers not more than 15 times in a year. The organization may ask them to attend a procession, a public meeting, or may contact them to collect money contribution to the party. For remaining 350 days of the year, the follower, sympathizer or the member of the organization do nothing. Therefore, every person belonging to any organization must devote himself for these 350 days in an activity of Bahujan mission of his choice and priority which he has chosen considering all his responsibilities, and liabilities. If everybody of us is devoted to some activity of Bahujan Mission then only we can think of defeating Arya-Brahminists.

15. Strengthen Social Media.

Arya-Brahminist media known as Manu-Media only presents the exploiters in limelight and hide their crimes. On the other hand, distort and blackout news of Bahujan masses and defame Bahujan agitators and activists. Have you ever seen any print or electronic media exposing Illuminati, Jewish Banking Cartel, Multinational companies, their depopulation plan, vaccination, WHO, How aids was spread through the vaccination program of WHO and so on ?

Manu-media will keep you busy in fake issues so that you never concentrate upon real issues. We not only need to concentrate on real issues but to make others also aware. Therefore, there is a need to create a parallel electronic social media on you tube and other platforms on internet.

16. As a Computer User, Use Linux Mint

1. Why you should install Linux Mint ?

i). Microsoft windows and its softwares costs heavily. Free anti-virus and other free utilities irritate by constantly reminding to buy their professional version. In due course, installed free version might disable certain features or may deliberately malfunction. In the end either you have a very unstable system or you spend money for their professional versions.

ii). Downloading pirated softwares costs heavily in many ways :- a) At random few persons are booked under piracy laws and are severely punished. Google keeps record of every web activity and knows who have illegally downloaded softwares. People downloading software illegally, unconsciously become prone to be morally corrupted.

iii). Because source code of windows and its applications is closed, they only can solve their software issues . They may be unwilling to do so, because “problem will be resolved with the next version” or the product may be no longer supported.

iv). Whenever windows applications are installed software

dependencies (other programs needed to run the software) are also installed by default. As a result, same dependencies with different names are installed and thus lot of junk is created and system becomes slow or unstable.

v). A music player is permitted to use only music files, a word processor only text files, video player only video files. and so on. But, anti-virus softwares are given many permissions to scan all files therefore, Installing an anti-virus software is inviting risks. Anti-virus software can itself become victim of viruses or may have inherent weak spots which can infect an anti-virus program. There is no check on them. They can easily hide their own failure by blaming recently released viruses, because there is always a big time gap between release of new viruses and finding their solution and incorporating that solutions in updates. Windows need anti-virus software as necessary evil because applications comes from variety of unpredictable sources.

vi). Windows systems have proprietary hardware. The biggest issue with proprietary drivers relates to bug fixing. To use a proprietary driver is to be at the mercy of the hardware manufacturer's own development and release schedule. If the driver has a serious bug, you'll either have to work around it or put up with troubling issues until the manufacturer offers an update. Linux is a bit different.

2. Benefits of Linux Mint.

1. Linux operating system as well as all Linux applications are free of cost. Libre office is a complete office suite. You have GIMP as photo editing software. Blender is 3D animation software. You have OpenShot video editor. uGet is very good download manager. Handbrake as video converter. VLC is top media player. Firefox is best web browser. Transmission is torrent downloader. Rhythmbox is a software to play and organize your music. Kde Marble as interactive globe. Artha is an English dictionary . There are Kalgebra and many other educational softwares and dozens of games. You find every type of application in Linux free of cost.

2. Linux Mint is very similar to windows therefore one should not experience any problem from switching to Linux mint. Other Linux distros such as Ubuntu, Red Hat etc are not as user friendly as Linux Mint is.

3. Linux is very stable and safe computer system because it is an open code platform i.e. any person knowing programming can read it's source code. Thousands of programmers out of their hobby and dedication to Linux community, as well as paid programmers daily scrutinize the Linux OS and every application created for Linux to find out weak spots for virus attack and find ways of improving it. Thus, Linux is not a company but a community dedicated to develop free software. You do not find Linux applications in Google search because all Linux softwares have to be downloaded from "Linux repositories" a website that contain all tested and verified Linux softwares. If any weak spot is revealed, it is immediately reported and solved with an update which come almost daily.

Whenever you download any software from Linux repository, you automatically download dependency softwares needed to run the program. If your Linux system already has those dependency softwares, Software manager / synaptic package manager will download only application software and discard dependencies. This does not overload Linux system with junk software.

4. You do not have to install any anti-virus program for Linux. An anti-virus program does not appear in any authentic Linux repository. Any virus attack, is quickly noticed by Linux community, solved and fixed through security updates which are released almost daily. Linux system in reality does not need any anti-virus software because no virus can enter into Linux Kernel unless it has obtained your root password. Any company that develops anti-virus software for Linux, exploits fear of persons who have shifted from windows to Linux and are conditioned to use an anti-virus program.

5. When you install Linux, you join Linux community. You realize that the most stable and reliable Linux computer

system that you are enjoying is the fruit of continuous efforts of thousands of people dedicated to create free software. Therefore, you develop sense of community belonging. Unknowingly you develop mentality of helping others. Thus you march towards morality, trust, and cooperation.

Family Empowerment

1. Boycott Manuist TVs and Newspapers

By buying Manuist newspapers and magazines and viewing paid satellite TVs we are empowering Arya-Brahminists while weakening ourselves economically as well as psychologically.

Electronic and print media of Arya-Brahminists through their unabated poisonous propaganda instills in Bahujans hatred about different communities and religion. Instills superstitions by fake documentaries and serials especially created for this purpose to give validity to Arya-Brahmin religion and cults. Through their TV serial they instill laziness, greed, jealousy and envy in the minds of masses where conspiracies of all kinds are shown as a common phenomena.

Arya-Brahminist News channels black out our news, distort our issues, and defame our agitation by fake arguments. On the other hand they present Arya-Brahminist exploiters as our saviors.

We are buying this manuist filth spending our money and weakening ourselves psychologically and economically. Therefore, every Bahujan family must develop a strong determination to stay away from all TV channels. Why we should pay our enemies ?

If you do not have such strong determination, forget about establishing system based on social justice. Forget about removing injustice.

Arya-Brahmins do have such determination. **Gandhi had boycotted goods manufactured by British.** Arya-Brahmins had

started weaving thread on Charkha. When a Brahmin girl Nirbhaya was raped in Delhi, in protest they did not celebrate Diwali festival. Arya-Brahmins will not watch a movie, or a game / sport if its hero or player is dalit so that the dalit hero or player becomes flop. **Can a Dalit run his shop in Savarna locality ?** It needs special guts to develop such mentality and courage which Bahujan masses utterly lack. **Are you a match to determination of Arya-Brahmins ? If you really want that the Brahminism must be defeated then every Bahujan must stop buying from our exploiter and oppressor class. This will save us lot of money and will keep our mind free for rational thinking.**

2. Stop buying useless periodicals !

Our Bahujan organizations and Bahujan activists publish periodicals such as weekly, fortnightly or even daily dragging them with their all might considering that they are doing a great work and great service to Bahujans. Bahujans who are buying such periodicals are also under wrong impression that they are doing great work of Bahujan mission. **In fact, they are wasting their money and time by giving information that does not lead masses to any action against Arya-Brahminists and their exploitation system. Neither they are empowering Bahujan masses anyway. They only create illusion of mission. Money of the Bahujan who buys such periodicals is also totally wasted.**

In fact, every Bahujan literature must activate masses for an action plan carefully devised and being implemented. Bahujan organizations have no carefully devised plan to weaken Arya-Brahminists and their exploitation system and empowering Bahujans which is being implemented.

Contrary to Bahujan Media, Look at every TV serial, every discussion, every news it is being conducted with a specific campaign being run by the Arya-Brahminists.

Our media must center around missionary activities. Usually Bahujan fake leaders carry fake activities hence no question of centering media content around any missionary activity. Have you seen any Bahujan organization launching campaign against superstitions being practiced by priests in Bahujan communities ? Do it launches campaign to creat differences among Arya-Brahminists and in their organizations ? Do they promote Bahujan Economy by providing concrete blueprint ? Do they provide foolproof plan to to safeguard Dalits from Arya-Brahmin violence ? Just think of your every day to day problems and you will see that there is no solution in any of Bahujan media. Bahujan periodicals sing same sermons again and again therefore, are totally useless, wastage of time energy and money.

Publishing periodicals require lot of money and energy. Those who publish them usually belong to richer section of Bahujans. Such rich Bahujans lack courage to take any true action against Arya-Brahminist exploitation system and usually become tools of the exploiters in the end. **Strengthening electronic social media is the only alternative which can be run by any member of common masses. Such social media have lowest probability of going astray.**

3. Keep your Home free from all kinds of priests

According to Babasaheb Dr. B. R. Ambedkar, priest is the evil genius who has destroyed Samma-Ditti meaning rational thinking of the masses. Priests no matter which religion they belong to are simply parasites sucking the vitality of the society. So called Buddhist Bhikkhus are no exception. Bhikkhus have converted themselves into priests because they are lazy and lack the qualities and abilities to earn money by hard labour.

They can not perform the duties of Bhikkhus as specified by Babasaheb Dr. B.R. Ambedkar because they lack Pradnya, Sheel and Karuna. They are replica of Hindu Priests. They have transformed the rational and useful Buddhism into a religion of superstitions and

rituals beneficial to themselves but harmful to the Bahujan masses. Therefore, keep your home free from these Brahminist priests in the garb of Buddhist monks.

4. No weakening Rituals and traditions

Costly rituals make your family financially weak while rituals based on blind faith and superstitions make you rationally bankrupt and puppet in the hands of priests. These rituals are being carried out because people have no courage to take a bold unconventional decision to defy them for the betterment of his own family. He is afraid of what others will say forgetting that in any financial or other crisis neither priest nor anybody of "others" would come to help you. You will have to face your problem alone. Then why we should care for what others will say ? **You have every right to do what is in the best interest of your family.**

One should perform all social functions with maximum possible simplicity with minimum possible expenditure. Secondary Social rituals after the main function is over, can be performed by few family members alone. For example, Once the funeral is over, immersing ash in river and the third day ritual can be performed within the family members without any priest.

5. Promotion of moral education.

Promotion of moral education among family members is must. Moral education train family members to understand the dangerous nature of laziness, greed, jealousy and envy. They are the worst enemies of mankind. They are basis of all sorts of exploitation. It is most important to understand how to develop Pradnya, Sheel and Karuna. They should understand whole philosophy of Babasaheb Dr. B. R. Ambedkar in a nutshell for the betterment of yourself, your family and the whole society.

You should train yourself to think and behave rationally. Realize the dangers of laziness, greed, jealousy and envy. Understand the

fundamental rights of everybody including your family members and respect them. Understand in advance how to behave with different sort of individuals in most appropriate way. Thus you know future consequences of your each action in advance. Appropriate behavior in the given situation saves you from unnecessary worries, tensions and losses otherwise would have resulted.

Understand the difference between comfort and happiness and how to obtain happiness from family and social interactions to live life meaningfully. Also know what is violence and when to use it against the exploiters for the betterment of all. Thus the moral education is practical philosophy of life leading us towards empowerment and meaningful life.

6. Strengthen family Economically

You will make your family financially better if you stop buying newspapers and magazines published by Arya-Brahminists and useless periodicals published by Bahujans. You will also save lot of money by not buying harmful foods and drinks which usually are costlier than the healthy foods. You will also save from not following harmful rituals and social traditions such as Diwali, Holi etc and performing other social functions such as marriage etc with at most simplicity and rationality.

Apart from the above measures every family member must know value of money and must spend rationally and save his money for most essential things such as education and self establishment.

Your family members must think individually about how they can earn money. Unless you think in that direction you will never find a solution. You always find a solution when you objectively think and do sufficient research on internet and other sources with a strong will. People also earn on line on internet in many ways.

You can produce nonperishable essential home items for your own family. On demand can make it your business among the

members of your friends in morning walk etc activities. Your healthy social interactions will provide you a market if you decide to sell something in your locality from your home.

You can start with one item which is bought in large quantity so that you can easily compete with the Arya-Brahminist businessmen. You can also buy in large quantity with the collaboration of other Bahujans doing their business in different locality. Then you can gradually add items one after the other.

We must not forget that we Bahujans are an enormous market which is being exploited by the Arya-Brahminists. They are enriching themselves from profit extracted from us. Why not we help each other in business and prosper. This can become a reality if you instill sentiments of mutual cooperation in Bahujan minds.

You will have to learn many social intelligence skills essential in a business. For example, you should treat your customer most politely even if he is not. Similarly we will have to get rid of tendencies which are harmful and unproductive in a business. Never become proud if your business flourishes. Maintain your social relations skillfully.

Social Empowerment

Social empowerment involve collective efforts. Exploiters and fake leaders consider it direct threat to their power. Therefore, Social empowerment activities are vulnerable from the interference of exploiters and fake leaders. Their agents will find selfish persons from among ourselves to disrupt any social empowerment activity. Therefore one needs to follow certain principles or requirements of social empowerment movement.

Basic Requirements

1. Do not bring any Ideology / Party in public issues :- In all social empowerment activities we should not bring any ideology

between us. Then only we will get cooperation of all sections of society. When we go to grocery shop, to a doctor, to any office and so on we only talk about the cause and not about any ideology. In the same way when we start any social empowerment activity, we must be concerned with how to implement the task most efficiently. Similarly, we should not bring any party politics in the social empowerment activity. Party politics is everybody's individual matter.

2. Get rid of dependency Mentality :- Bahujans must get rid of their mentality of dependency on leaders. You have to depend on yourself for your own emancipation. **We have had enough with the leaders. Unless masses themselves control their social empowerment activity they can not hope of a genuine struggle for social empowerment.** People have shown time to time that they are capable of doing that. For example, Khairlanji movement was spontaneously run by the masses themselves. All India strike protesting against violence committed by Arya-Brahminists upon gathering of Dalit-Bahujans at Bheema Kiregaon valour memorial was also spontaneously run. Several strike in textile mills, and railway strikes in Nagpur were conducted by workers themselves. Later on leaders came to ride on the tide. If masses fully control the social empowerment activity / movement then leaders remain merely effigies controlled by the masses.

3. Self-reliant informal aware groups :- All formal organizations are made up of caste-system like pyramid structure and essentially yield all powers in the hands of few elites. Leaders of such formal organizations are always those who do not need to labor for their survival and have full time to lead the organization. Such leaders being power mongers can be easily corrupted. Bankers are happy with formal organizations because they can buy such leaders, can easily blackmail them, can easily infiltrate, mislead, split and sabotage any formal organization. If needed they can dump the whole organization into jails and in concentration camps.

Therefore, we need really strong men free from laziness, greed

and envy and are completely dedicated to social Justice. We need dedication to mission of social justice and not to the organization itself since no single organization can fight at all fronts viz economical, educational, religious, legal, peasants, students, womens etc and also face armed terrorist organizations of the Arya-Brahminical exploiters. Therefore, everybody of us need to support all missionary activities no matter which organizations are carrying them. Everybody of should work for the activity one has chosen considering one's own potentials, weaknesses, resources, liabilities and responsibilities.

To conduct activities at "socio-political level", small self sufficient informal groups of 1-5 persons having self-chosen level of discipline (needed for the tasks undertaken), will work for chosen missionary activity / activities by taking unanimous decisions. Unanimity of decision is basic criteria for implementing any activity and will be implemented only by those who decide proposed activity unanimously. Members differing should secede and form their own informal group to carryout an activity in their own way.

These small informal unconnected groups, expressing the very essence of popular instincts, work among the masses. They do not threaten the freedom of the people, because they lack official position all times. They influence the people exclusively through the natural, personal influence of its members. They would suggest actions in a given situation and with the approval of people implement it and participate as one of the common element of the people.

Everybody assumes different responsibilities in different situations. Therefore, nobody in masses is postholder because there are no such posts at all. There are only different responsibilities in different situations. These invisible groups should be scattered in an unseen web throughout the regions, districts and localities to direct the spontaneous movements of the people arising out of situations, towards the Social Justice as a natural development of each movement. **The informal groups must not attempt to take**

over and lead the movement but clarify goals, work out ideas in correspondence with the instincts of the masses and put forward propaganda. They should ensure that people do not undertake any self-harming activities. Rather their every activity should harm and weaken the exploiters and their exploitation system.

Few examples of social empowerment activities are given below. **Our purpose is to make Bahujan masses to think in this direction. They themselves will develop needed social empowerment programs considering their situation and various needs.**

1. Morning Groups

Every day, particularly middle class men and women come for morning walk. Awareness group should take initiative and organize them to conduct activities such as exercise, laughing, entertainment, social games etc in the public utility place or garden of the locality. They may celebrate each other's birth days etc events with most simplicity and cordially. The basic purpose is to enhance pleasure in everybody's life. Exchange useful information through smart phone. They should become more socially aware and inclined to do something significant for social cause. For example, one such morning group of women named as "Savitribai Fule Mahila Mandal*" had published a pamphlet to help innocent youths accused by police. These youths were protesting violence unleashed by Arys-Brahminists upon Dalit-Bahujans gathered at Bheema Koregaon Valour Memorial near Pune. These pamphlets were pasted throughout Nagpur in Dalit areas. The pamphlet suggested that total legal expenditure should be divided into number of Dalits localities and each Dalit locality should collect the assigned amount and directly handover it to the lawyers concerned, in the presence of all. This will make Dalit community to deal against injustice without depending on any political party and their fake leaders.

2. Inter-personal cooperation

Each Morning Group members may have some special interest, resources, contacts, profession, useful information and skills important to others. If members benefit each other everybody will be benefited and group may feel more stronger and cohesive. This interpersonal cooperation should grow naturally through better interpersonal relationships and not by enforced group rules. They can buy each other's produce, avail services provided by some of them, benefit from one's contacts, take interest in one's hobbies etc.

3 Substitutes of priests

Pitamaha Mahatma Jyotirao Fule tried to keep Bahujans free from religious rituals and Brahmin priests of Arya-Brahmin religion to free them economically and mentally. To keep every family free from priests, citizens should train themselves and to perform marriage ceremony. Some citizens can not fully negate supernatural. So they want to perform religious ceremony at the time of entering a newly built house etc. For such occasions specially prepared CD of preaching should be developed rationally in the language of masses and shall be played after Buddha Vandana. Whole ceremony shall be performed by any trained common Bahujan. Aware Buddhists can prepare CD of Buddha Vandana and Buddhist ideology topics of special interest relevant to the various social occasions. These CDs could be played by any common Bahujan.

4. Community help center

Most of the Bahujans suffer to a great extent when they have some work in civil bodies such as municipal corporation, office of collector, electricity board, Water department, banks and so on. They also experience difficulties in preparing or obtaining essential documents from district court and other offices.

Any unemployed educated person of their ward or locality can well acquaint himself with the procedures to be followed for various tasks in above mentioned offices. With a laptop and printer cum

scanner he can start his center to provide his services to needy persons at nominal charges.

Minor legal works such as preparing affidavit, gap certificate, income certificate etc can be managed by any unemployed youth of the area well acquainted in such work. Thus Bahujans will not have to wander for help and at least one person in each Bahujan ward can find a part time employment.

5. Legal Assistance

Poor Bahujans need legal assistance or help in different matters. Aware Bahujans should contact Bahujan lawyers and Bahujans related to judiciary. Ask each of them to provide their services to their Bahujan brethren at concessional rates. A rate-list for their different services can be prepared and compiled in a file so that information can be provided to anybody needing legal assistance. This information file should be kept in every community help center of the ward. Lawyers committed to social justice should fight cases of Dalit victims at concessional rates and cost of which should be born by society directly as suggested by Savitribai Fule Mahila Mandal.

6. Guidance Centers for Students

In every ward or area guidance centers for students can be opened by 1-2 aware persons. They can collect the information of various courses available, scope of each of these courses, Institutions that teach these courses, fees and other requirement, date of commencement of such courses and so on.

Students should be given knowledge in advance of which documents they will have to keep ready in order to get admission, and to apply for scholarship. Students guidance center will have proforma of each such documents to be obtained from different government offices. On request, center should help students to obtain these documents at nominal charges. Students coming from different places loose their admission claim because they do not know when

their name appeared in the list. Out station students should contact such guidance center in each city, so that the guidance center can keep track of out station students and immediately inform them and do preliminary proceedings on their behalf. They can also keep list of persons who rent their rooms to students so that any student coming to their city in need of room can be helped.

7. Community Self Reliance centers

In every Bahujan ward we should find an industrious unemployed youth. Such a youth can be trained to prepare nutritious healthy morning breakfast items. We should convince aware Bahujans to buy daily morning breakfast items from this youth so that one youth have an opportunity to earn and Bahujan money shall not go to Arya-Brahminist fast-food companies. Little of its profit can be saved for helping victims of Arya-Brahminist violence. If in every ward or area the same program is implemented then many of our unemployed youths shall find self employment. Youths can be trained in different self employment projects.

8. Direct Consumer-Producer Link

We find that because of Arya-Brahminist middlemen our Bahujan farmers do not get proper value for their produce. The produce of farmers when reaches to consumer, its cost increases many times. To help farmers as well as consumers, aware Bahujans collectively / individually can buy produce of a farmer who is well known to him. This produce can be shared by citizens of the area at much lower price compared to Arya-Brahminist shops. One should start with one item or few items and implement the same program in every Bahujan ward or area. This will help many Bahujans to earn money. Self employment seminars and seminars to train Bahujans already doing some bussiness pathetically can be organized so that they can run their business in a profitable way,

9. Resisting Injustice and oppression

Injustice on Bahujans must be resisted by the society itself without depending upon any political organization. Bahujan organizations have already proven themselves incapable in this regard. Whenever there is violence on Dalits or any section of Bahujans, **we should :-**

1) Organize meetings of citizens of each Dalit-Bahujan ward in the very locality public utility place and without using any loud speaker. They should collect amount of their share to help the victims and to see that perpetrators are punished.

2) The victimized families could be invited to each area / ward and personally hand over the collected amount to them in the presence of all citizens to a) financially help the victim to fight their court cases and face their social boycott by Arya-Brahminists if any. b) ask citizen to suggest other measures to be taken in this regard.

3) If the offenders and their supporters are member of a particular party then the citizens must insure that these men do not get elected anymore and their party is boycotted.

4) If the offenders are running some commercial venture, the citizens should insure that the offenders suffer economically by boycotts and other measures.

5) It must be ensured that the offenders and their supporters inevitably suffer for their crimes.

Only by applying above measures we can effectively retaliate oppression of Bahujans.

10. Brotherhood Committees

In communal violence Non Arya-Brahmin Bahujans suffer whereas Arya-Brahmins not converted and converted to Islam remain unharmed. Arya-Brahmins of all religions work in unison to weaken Muslim as well as non Muslim Bahujans. Therefore, in order to prevent communal violence we must form a committee exclusively of indigenous Dalit-OBC Muslims and non Muslims. The

Brotherhood Committee should implement following programs :-

1. Diffuse Arya-Brahmin hate propaganda against Muslims by publishing small booklets in local languages and by organizing awareness talks.
2. Promote social interaction between both the communities in a natural way such as through sports etc activities where both the teams have both Muslim and Non-Muslim players.
3. Promote economical cooperation between both the communities.
4. Keep an eye on Arya-Brahmin agent provocateurs (who try to create conflicting situation) and expose their activities.

11. Community Self-Defense Volunteers

Great Ayyankali and Babasaheb Dr. B. R. Ambedkar from the very beginning had realized that unless you have self defense force of youths you can not protect yourselves from Arya-Brahminist violence. Arya-Brahminist violence occurs because the perpetrators know that there will not be harmed. The moment they realize that attacking Dalit-Bahujans is counter-productive they think thousand times before committing any offence. Thus Self-defense Youth Force is basic requirement of every struggle against the exploiters and oppressors.

The moment they build such an effective force which is not only capable enough to defend themselves but can withstand to all sorts of after effects effectively, the situation will change completely. All other communities will join voluntarily whether you educate them politically or not. Community defense volunteers must be backed by whole society against repression by Arya-Brahmin governments under false accusations.

12. Bahujan Propaganda Groups

Forming Bahujan Propaganda Groups in every Bahujan locality is very important. The basic purpose of Bahujan Propaganda Groups should be as under :-

1. Expose false propaganda of Arya-Brahminists that Arya-Brahminists are patriots. Expose that they have invited every foreign rulers to invade India, have given Muslim minority areas to east Pakistan (now Bangla Desh) simply to protect Brahmin interest in west Bengal and to take vengeance upon Dalits. That they have been helping every ruler to rule India and protecting their own interests. That they have been helping British during British rule. In spite of such treacheries they call themselves freedom fighters and so on.

2. Reveal that Arya-Brahmins are not Hindus. To get exempted from Jijya tax imposed by Aurangjeb, Brahmins had declared that they are not Hindus, they belong to Vedic religion and not Hindu religion. They call themselves Hindus simply to grab share of Hindu community for themselves.

3. Expose that tiny minority of Arya-Brahminists who are simply 15% as well as their BJP, RSS etc organizations in reality are worst enemies of Hindu interest because with all their might Arya-Brahminists have been preventing realization of reservation to Dalits, OBCs and Adivasis according to their population proportions. OBC, Dalits and Adivasi constitute 85% majority of Hindu population. They are not giving representation to OBC, SC, ST and minority community womens in women's reservation bill. They have been killing OBC, Dalits and Adivasis in communal riots. No Arya-Brahmin has ever killed in these riots. Thus Arya-Brahminists and their organizations are worst enemies of Hindus.

4. Expose that 15% Arya-Brahminists have grabbed 87% jobs, 97% commerce, 78% education and 94% land. Taking average of all above area, OBCs who are 52% have only 6,36% share, SCs who are 15% have only 5.92% share; STs who are 7.5% have only 2.42% share.

Minority religions who are 10.5% have only 1.80% representation. Thus Arya-Brahmins have grabbed everybody's share. They have grabbed largest share of OBC communities (45.64%) because OBCs are under the firm grip of Arya-Brahmin religion.

5. In propaganda literature, demand leadership posts for OBC, DALITS and Adivasis according to their population proportion in BJP, RSS and in all Sangh-Parivar organizations.

6. Demand that immense wealth of Hindu Temples should be spent on relief of Hindu farmer families who have committed suicide, Hindus who were killed in communal riots, Hindus who are displaced by Arya-Brahmin ruled governments and so on.

Bahujans should organize their artist groups of all kinds such as singers, dramatists, cartoonists and so on who can contribute meaningfully to Bahujan propaganda.

12. Resettlement of Victims of Arya-Brahminist Violence

1. Babasaheb Dr. B. R. Ambedkar wanted resettlements of Dalits by forming their own localities at safer places preferably cities. Considering the violence against Dalits all over India, there is a need to identify areas where Dalits are living under threatening conditions and areas where Dalits feel themselves more secure. Dalits from insecure area should migrate to near safer area.

2. Bahujan social organizations / aware Bahujans should help violence affected Dalits individually or in mass to sell their property for good price and buy property in safe areas. They should also make it sure that these Dalits with their abilities can earn sustenance in new area. Respective governments should be pressed to buy property of victims at "best rates" and to provide financial assistance for their resettlement. Governments not responding should be condemned by Bahujans in Bahujan Localities and pass resolutions accordingly.

3. Aware Bahujans can train these Dalits in certain skills so that they earn their sustenance.

4. Bahujans spend millions of rupees in celebration on 14 April etc occasions. They can curtail their expenditure and divert the amount to "Resettlement Fund" organized for resettlement of Dalit victims of Arya-Brahminist violence. The Dalits who have received help will have to under some legal arrangement return it back to resettlement fund in installments. Thus the Resettlement fund shall be always growing and more and more Dalits can be resettled.

5. Bahujan masses should should deal accordingly all political parties who do not pressurize respective governments to purchase dalit land (which is allotted only on paper) and house property at market price and provide land at secure areas at subsidized price, and implement all their so called welfare schemes in such area.

13. Saving Bahujans from money lenders.

Whether they are farmers or workers the biggest cause of their debacle is money lender. Farmers are forced to get loan at very high interest from the money lender under natural calamities.

Many Bahujans are keeping their savings in Banks. Instead they can give loan to such farmers whom they know well at the interest bank gives to them. They should do this for the sake of empowering Bahujans. Several Bahujans belonging to any organization can withdraw their savings from the banks and form a fund to help the farmers.

14. Inter-community Alliance

There are unfortunate instances when the farmers, workers, students etc Bahujan sections organize processions, sit on hunger strike and so on. Such agitating sections should make mutual social alliances to carry on their struggle. The great Dalit warrior of Bahujan liberation, Ayyankali was able to prolong agricultural labourers' agitation for more than a year by mutual social alliance

with fisher community. It was decided that one person from each family of agricultural worker would help them in fishing and will receive their due share of fishes. Thus agitating sections should make their agitation socially allied so that they get strength and exploiters may be brought to concede their demands. It is happy beginning that agitating farmer procession received food packets, water and other help from the students and other sections of the society. There should be a mutual meaningful dialog between the agitators and the social groups. They should exchange each others' literatures and concerns.

15. Quality Primary Education in public utility places of the locality

Arya-Brahminist governments to keeps masses deprived of education has made primary education in government run schools very miserable. Students in these schools are very close to illiterates. They can not compete with arya-Brahmins who get quality education in English medium schools. All Arya-Brahminists Governments including governments led by Bahujans have been privatizing every educational institution. Intention of all fake leaders is clear.

Masses themselves will have to do something in this regard. Masses with their collective effort can at least start quality primary education in public utility places of the area such as Samaj Bhawans, Boudh Vihars, Religious temples, gardens, public grounds etc.

There are example when people of the village have themselves built roads, sever lines and so on. Therefore, with strong determination masses can implement this program successfully.

There are able unemployed teachers as well as parents who can pay little fee. The need is to bring them together and decide the terms under the supervision of willing people of the area.

It is welcome news that Chief of Bheem Army, Mr. Chandrashekhar Ravan anounced his determination to start english teaching for dalit students everywhere. More and more such organizations should

come forward. Shoshit Samaj Jagrukta Muhim praises all missionary activities conducted by Bahujans no matter which organization they belong to. Similarly we criticize useless or detrimental actions to Bahujans no matter which organization do them. We do not name the organization but the criticize its activity.

16. Public interest Litigations and RTI

Arya-Brahmins file public interest litigations to prevent Bahujans from getting their rights. Bahujans should file public interest litigations on several issues. They can be more productive than sitting on hunger strike and launching a procession or convening a public meeting. Similarly, Bahujans should train themselves in Right to Information law and use it meaningfully in their favor. In this regard special seminars should be conducted in each ward. Most of the noncooperation by Arya-Brahminist bureaucracy can be demolished through RTI and PLIs.

18. Unpublished literature of

Babasaheb Dr. Ambedkar's in Govt. Custody.

Aware Bahujans should demand that unpublished literature of Babasaheb Dr. B. R. Ambedkar should be published by a committee comprising representatives of the Bahujans. A compilation of the photocopies of manuscripts written by Babasaheb Dr. B. R. Ambedkar should be made and kept in libraries to be accessed by the research scholars. It is surprising that no Bahujan organization has pressed for this issue.
